Gaston County EMS
Skills Competencies – Fall 2017

Skill	Performance Objectives	Key Points to Review	Resources	Participant Validation	Evaluator Validation
Transcutaneous Pacing – Adult	-Verbalizes indications -Verbalizes considerations for sedation -Determines correct rate and amperage -Administers energy correctly	-Indications / Contraindications -Review of LP15 features -Pacer spikes / pacer detection -Midazolam dosing for sedation -Fentanyl dosing for analgesic	-Skills Workshop Ed. Material -Procedure #27 -Protocol #10	_____	_____
Defibrillation – Adult	-Verbalizes indications -Determines correct joules -Administers energy correctly	-Indications / Contraindications -Review of LP15 features -Energy dosing	-Skills Workshop Ed. Material -Procedure #24, #25 -Protocol #4, #5, #6	_____	_____
ECG / 12-Lead Application	-Verbalizes indications -Verbalizes location of electrodes -Applies electrodes correctly	-Indications / Contraindications -Right sided and posterior EKG -12 lead distributions for STEMI location	-Skills Workshop Ed. Material -Procedure #1 -Protocol #13	_____	_____
Cardioversion	-Verbalizes indications -Verbalizes considerations for sedation -Determines correct joules -Administers energy correctly	-Indications / Contraindications -Press sync button before each shock -Absolute vs Relative refractory periods -Midazolam dosing for sedation	-Skills Workshop Ed. Material -Procedure #26 -Protocol #11, #12	_____	_____
Tourniquet	-Verbalizes indications -Verbalizes consideration for analgesic -Places device correctly	-Indications / Contraindications -Review of SOF-T Tourniquet features -Shock management (IVF, blanket, hemostatic agents, etc) -Pull strap as tightly as possible prior to twisting the windlass handle -Fentanyl dosing for analgesic	-Skills Workshop Ed. Material -NREMT Skills Sheet -Procedure #45 -Protocol #63	_____	_____
Traction Splint	-Verbalizes indications -Verbalizes consideration for analgesic -Places device correctly	-Indications / Contraindications -Review of Sager Splint features -Fentanyl dosing for analgesic	-Skills Workshop Ed. Material -NREMT Skills Sheet -Procedure #30 -Protocol #63	_____	_____
TXA Administration – Adult Trauma	-Verbalizes indications -Determines correct dose -Administers medication correctly	-Indications / Contraindications -Route of administration -Adult dosing	-Skills Workshop Ed. Material -Procedure #52 -Protocol #34, #84	_____	_____

Gaston County EMS
Skills Competencies – Fall 2017

Skill	Performance Objectives	Key Points	Resources	Participant Validation	Evaluator Validation
Sam Sling – Pelvic Binder	-Verbalizes indications -Places device correctly -Verbalizes consideration for analgesic	-Indications / Contraindications -Fentanyl dosing for analgesic	-Skills Workshop Ed. Material -Protocol #34	_____	_____
Defibrillation - Pediatric	-Verbalizes indications -Determines correct joules -Administers energy correctly	-Indications / Contraindications -Review of LP15 features -Energy dosing	-Skills Workshop Ed. Material -Procedure #25 -Protocol #42, #43	_____	_____
IV Epinephrine – Pediatric Arrest	-Verbalizes indications -Determines correct dose -Administers medication correctly	-Indications / Contraindications -Route of administration -Correct concentration -Reversible causes	-Skills Workshop Ed. Material -NREMT Skills Sheet -Procedure #52 -Protocol #43, #44, #46	_____	_____
Bag Valve Mask Ventilations - Pediatric	-Verbalizes indications -Verbalizes correct ventilation rate -Demonstrates correct ventilation rate	-Indications / Contraindications -Ventilation techniques -Ventilation rates -Capnography	-Skills Workshop Ed. Material -NREMT Skills Sheet -Procedure #2 -Protocol #40, #41	_____	_____
IM Epinephrine – Pediatric Asthma	-Verbalizes indications -Determines correct dose -Administers medication correctly	-Indications / Contraindications -Route of administration -Correct concentration	-Skills Workshop Ed. Material -Procedure #52 -Protocol #50	_____	_____
Bag Valve Mask Ventilations - Adult	-Verbalizes indications -Verbalizes correct ventilation rate -Demonstrates correct ventilation rate	-Indications / Contraindications -Ventilation techniques -Ventilation rates -Capnography	-Skills Workshop Ed. Material -NREMT Skills Sheet -Procedure #2 -Protocol #2, #3	_____	_____
CPAP	-Verbalizes indications -Selects correct pressure -Attaches to O2 source -Places device correctly	-Indications / Contraindications -When to remove CPAP mask -CPAP vs BVM decision -COPD vs Asthma pressures	-Skills Workshop Ed. Material -Procedure #6 -Protocol #16, #17	_____	_____
TXA Administration – Pediatric Trauma	-Verbalizes indications -Determines correct dose -Administers medication correctly	-Indications / Contraindications -Route of administration -Pediatric dosing	-Skills Workshop Ed. Material -Procedure #52 -Protocol #59, #84	_____	_____
IN Versed – Pediatric Seizure	-Verbalizes indications -Determines correct dose -Administers medication correctly	-Indications / Contraindications -Route of administration -Correct concentration	-Skills Workshop Ed. Material -Procedure #52 -Protocol #54	_____	_____
