

# HARVEY RESILIENCY AND RECOVERY PROGRAM

The Trauma and Grief Center at

Texas Children's Hospital®

## WHO WE ARE

The Trauma and Grief Center at Texas Children's Hospital is home to the Harvey Resiliency and Recovery Program (HRRP), a new mental health initiative designed to assist youth who have been negatively impacted by Hurricane Harvey.

Our mission is to not only help kids "bounce back" after the hurricane, but build life-long coping skills that will enhance their well-being for years to come.

## WHAT WE DO

- Provide information and resources to caregivers, teachers and health care professionals about what to expect from children and adolescents in the aftermath of Hurricane Harvey
- Develop and distribute screening tools that can be used to identify youth who may be struggling with psychological or behavioral health issues as a result of Hurricane Harvey
- Provide evidence-based, trauma-informed assessments and interventions to children and adolescents ages 8 to 17
- Provide multi-tiered trainings in the community for both immediate and longer-term mental health care among youth exposed to Hurricane Harvey and its aftermath

## HOW TO REACH US

For appointments, contact: Daniel Martinez, Intake Coordinator  
832-822-3829 | [daniel.martinez@bcm.edu](mailto:daniel.martinez@bcm.edu).

To schedule a training, contact Tim Brown, HRRP Program Manager  
832-826-4867 | [timothy.brown@bcm.edu](mailto:timothy.brown@bcm.edu)

For general questions about the HRRP, contact Dr. Julie Kaplow  
Director of the Trauma and Grief Center and HRRP Program  
[Julie.Kaplow@bcm.edu](mailto:Julie.Kaplow@bcm.edu).
